

Community Engagement Report. Tami Galitz

A big focus for me this year has been getting each local board involved in their community. I have reached out to all local presidents and AE's to get feedback on what their board is involved in. I have asked that they send me pictures of the events so I can share them with the state and they can be on our Facebook, in hopes that this will keep everyone involved, help with core compliance and give ideas to other boards of different things to do throughout the year. I haven't hear from all of the boards but those who have responded have a lot of great things planned. I am hoping to get enough response and involvement that I can put some sort of display together for State Convention so all the members can see how we as REALTORS are involved in our community.

As discussed at the Strategic Planning session, the cost of a mail out newsletter is extremely expensive but the information needs to get out to our members, after Legislative session I am going to put together an update from the Board of Directors and have it posted on our closed Facebook page. I feel that this is the most efficient way to reach our members to keep them informed.
